

General Environmental Incident Summary

Incident: 3405 **Date/Time Notice:** 7/31/2014 1550 **DEM Incident No:**
Responsible Party: Winfield Solutions, LLC
Date Incident: 7/30/2014 **Time Incident:** 1400 **Duration:** 1 minutes
County: Mountrail **Twp:** 156 **Rng:** 91 **Sec:** 23 **Qtr:** SE
Lat: 48.31711 **Long:** -102.33180 **Method:** Interpolation from map
Location Description: 2 mi east of Stanley at the intersection of US 2 and 79th Ave NW

Submitted By: Craig Ellsworth **Affiliation:** Winfield Solutions, LLC; Land O' La
Address: 525 5th St SE
City: Minot **State:** ND **Zip:** 58701

Received By:

Contact Person: Craig Ellsworth
525 5th St SE
Minot, ND 58701

Distance Nearest Occupied Building: 0.5 Miles **Release Contained:** Yes

Type of Incident: Vehicle Accident

Description of Released Contaminant: Gramoxone SL by Syngenta; paraquat

Volume Spilled: 0.13 gallons **Ag Related:** No

EPA Extremely Hazardous Substance: No **Reported to NRC:** Unknown

Cause of Incident:

Semi with 53' van trailer container 6 each 120 gallon IBC of Gramoxone SL impacted the rear of a gravel semi that pulled out of 79th Ave NW in front of semi van truck.

Risk Evaluation:

The product is corrosive and toxic; however, the amount of product involved was negligible. Injury was from the impact from the vehicle accident and not from exposure.

of Fatalities: 0 **# of Injuries:** 1 **Affected Medium:** 09 - other

Potential Environmental Impacts:

Any adverse affects to environment very unlikely due to the negligible amount of product involved and the fact it was contained, absorbed, and removed from paved surface under the supervision of Montrail Co LEPC.

Action Taken or Planned:

The tanks did not rupture. The impact of the collision caused liquid product to briefly escape from the vents on the top of the containers. A small amount of product leaked into van trailer that subsequently was dripping from van onto pavement. Product was absorbed by absorbent material and removed from pave surface and placed into one poly bag. Bag was removed from site and transported back to Winfield in Minot, ND along with the 6 - 120 gal containers.

Wastes Disposal Location: The bag of absorbent with liquid will be safely stored at the Winfield Minot warehouse until the next available Project Safe Send for disposal

Agencies Involved: NDDES, State Highway Patrol, Local Law Enforcement, Local Emergency Manager

Updates

Date: 7/30/2014 **Status:** Reviewed - No Action Required

Author: Roberts, Kris

Updated Volume:

Notes:

7/30/14 - Received call from county emergency manager who was on location of the accident. He state that only a very small amount of the material splashed out of one of the totes and dripped on to the pavement. Material was absorbed by Floor Dry and picked up for disposal. No follow-up inspection is necessary.

Date: 8/1/2014 **Status:** Correspondence
